

About GradingPal

GradingPal is an AI-assisted assessment platform that helps teachers spend less time grading and get more insight from every assignment. From essays and handwritten math to science labs, slide decks, and recorded presentations, GradingPal brings diverse student work into one rubric-based workflow. Suggested scores come with explanations and supporting evidence, while individualized feedback gives students concrete next steps. Teachers stay in control, reviewing and editing results before sharing them.

Beyond grading, GradingPal helps educators spot shared misconceptions, track progress against learning standards, and decide what to teach next—connecting assessment, feedback, and lesson planning. Learn more at gradingpal.com

What Educators Are Saying

“GradingPal individualizes feedback specific to each student and gives steps to improve their performance. I also love the ability to change the tone of feedback for different assignment types. The team is incredibly helpful and responsive too.”

Michelle Douglass

Research & Anatomy/Physiology, Grades 11–12
Central Virginia Governor’s School, Lynchburg, VA

“The math capabilities and accuracy have been great. Students can turn in homework digitally but keep hard copies for studying, and the Google Classroom integration is very convenient.”

Brandon McClurg

Mathematics
Grapevine Faith Christian School, TX

“GradingPal helps me optimize my time by streamlining the grading process. What I like most is the feedback students receive — it is specific and it is something they can act on.”

Adriana Barrios Rodriguez

Health Sciences & Teacher Education
Universidad Autónoma de Sinaloa, Mexico
